JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 29, No. 6, November–December 1992

1992 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 872–876, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 877–878, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 879–883, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1992, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Viscous Supersonic Flow Computations over a Delta-Rectangular Wing with Slanting Surfaces A92-024
Multizonal Navier-Stokes Solutions for the Multibody Space Shuttle Configuration A92-017

Aeroelasticity and Aeroservoelasticity

Buffet Response of a Hammerhead Launch Vehicle Wind-Tunnel Model A92-057

Aerospace Plane

Engineering Method for Calculating Surface Pressures and Heating Rates on Vehicles with Embedded Shocks A92-120
Comparison of Single-Stage and Two-Stage Airbreathing Launch Vehicles A92-116
Numerical Simulation of High-Speed Flows About Waveriders with Sharp Leading Edges A92-104
Endoatmospheric Thrust Termination Condition to Achieve a Low Earth Orbit A92-054

Communication and Air Traffic Control

Land-Mobile-Satellite Fade Measurements in Australia A92-016

Deceleration Systems

Computational Flow Predictions for Hypersonic Drag Devices A92-122

Flight Mechanics

Endoatmospheric Thrust Termination Condition to Achieve a Low Earth Orbit A92-054

Military Missions

SKIRT Space Shuttle Glow Experiment A92-013

Structural Design (Including Loads)

What is an Optimal Spacecraft Structure? A92-070

Energy

Photovoltaic Power

Arcing Rates for High Voltage Solar Arrays: Theory, Experiment, and Predictions A92-079

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Oscillatory Instabilities in a Rapidly Rotating Liquid Annulus A92-072
Comparison of Heating Calculations with Experimental Data on a Modified Shuttle Orbiter A92-030

Boundary Layers and Heat Transfer—Turbulent

Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Flow over an All-Body Hypersonic Aircraft: Experiment and Computation A92-001

Boundary-Layer Stability and Transition

Cooling and Roughness Effects on Transition on Nozzle Throats and Blunt Bodies A92-063
Liquid Crystal Coatings for Surface Shear-Stress Visualization in Hypersonic Flows A92-023

Computational Fluid Dynamics

Natural Convection with Thermocapillary and Gravity Modulation Effects in Low-Gravity Environments A92-134
Navier-Stokes Stall Predictions Using an Algebraic Reynolds-Stress Model A92-125
Shock Interference Prediction Using Direct Simulation Monte Carlo A92-123
Computational Flow Predictions for Hypersonic Drag Devices A92-122
High Angle-of-Attack Inviscid Shuttle Orbiter Computation A92-118
Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Numerical Simulation of High-Speed Flows About Waveriders with Sharp Leading Edges A92-104
Viscous Equilibrium Computations Using Program LAURA A92-099
Predicted Flight Performance of Base-Bleed Projectiles A92-055
Supersonic Flow over an Axisymmetric Backward-Facing Step A92-053
Free-Flight Trim-Angle Predictions for the Aeroassist Flight Experiment A92-051
Hybrid Navier-Stokes/Monte Carlo Method for Reacting Flow Calculations A92-048
Navier-Stokes Computations for Pointed, Spherical, and Flat Tipped Shell at Mach 3 A92-047
Navier-Stokes Flow Simulation of the Space Shuttle Main Engine Hot Gas Manifold A92-036
Viscous Supersonic Flow Computations over a Delta-Rectangular Wing with Slanting Surfaces A92-024
Multizonal Navier-Stokes Solutions for the Multibody Space Shuttle Configuration A92-017
New Technique for Low-to-High Altitude Predictions of Ablative Hypersonic Flowfields A92-004
Improved Nonequilibrium Viscous Shock-Layer Scheme for Hypersonic Blunt-Body Flowfields A92-003
Application of the LAURA Code for Slender-Vehicle Aerothermodynamics A92-002
Flow over an All-Body Hypersonic Aircraft: Experiment and Computation A92-001
Three-Dimensional Upwind Parabolized Navier-Stokes Code for Real Gas Flows A90-026

Military Missions

SKIRT Space Shuttle Glow Experiment A92-013

Structural Design (Including Loads)

What is an Optimal Spacecraft Structure? A92-070

Energy

Photovoltaic Power

Arcing Rates for High Voltage Solar Arrays: Theory, Experiment, and Predictions A92-079

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Oscillatory Instabilities in a Rapidly Rotating Liquid Annulus A92-072
Comparison of Heating Calculations with Experimental Data on a Modified Shuttle Orbiter A92-030

Boundary Layers and Heat Transfer—Turbulent

Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Flow over an All-Body Hypersonic Aircraft: Experiment and Computation A92-001

Boundary-Layer Stability and Transition

Cooling and Roughness Effects on Transition on Nozzle Throats and Blunt Bodies A92-063
Liquid Crystal Coatings for Surface Shear-Stress Visualization in Hypersonic Flows A92-023

Computational Fluid Dynamics

Natural Convection with Thermocapillary and Gravity Modulation Effects in Low-Gravity Environments A92-134
Navier-Stokes Stall Predictions Using an Algebraic Reynolds-Stress Model A92-125
Shock Interference Prediction Using Direct Simulation Monte Carlo A92-123
Computational Flow Predictions for Hypersonic Drag Devices A92-122
High Angle-of-Attack Inviscid Shuttle Orbiter Computation A92-118
Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration A92-107
Numerical Simulation of High-Speed Flows About Waveriders with Sharp Leading Edges A92-104
Viscous Equilibrium Computations Using Program LAURA A92-099
Predicted Flight Performance of Base-Bleed Projectiles A92-055
Supersonic Flow over an Axisymmetric Backward-Facing Step A92-053
Free-Flight Trim-Angle Predictions for the Aeroassist Flight Experiment A92-051
Hybrid Navier-Stokes/Monte Carlo Method for Reacting Flow Calculations A92-048
Navier-Stokes Computations for Pointed, Spherical, and Flat Tipped Shell at Mach 3 A92-047
Navier-Stokes Flow Simulation of the Space Shuttle Main Engine Hot Gas Manifold A92-036
Viscous Supersonic Flow Computations over a Delta-Rectangular Wing with Slanting Surfaces A92-024
Multizonal Navier-Stokes Solutions for the Multibody Space Shuttle Configuration A92-017
New Technique for Low-to-High Altitude Predictions of Ablative Hypersonic Flowfields A92-004
Improved Nonequilibrium Viscous Shock-Layer Scheme for Hypersonic Blunt-Body Flowfields A92-003
Application of the LAURA Code for Slender-Vehicle Aerothermodynamics A92-002
Flow over an All-Body Hypersonic Aircraft: Experiment and Computation A92-001
Three-Dimensional Upwind Parabolized Navier-Stokes Code for Real Gas Flows A90-026

Hypersonic Flow

Energetics of Gas-Surface Interactions in Transitional Flows at Entry Velocities A92-124
Proposed Radiometric Measurement of the Wake of a Blunt Aerobrake A92-121
Engineering Method for Calculating Surface Pressures and Heating Rates on Vehicles with Embedded Shocks A92-120
High Angle-of-Attack Inviscid Shuttle Orbiter Computation A92-118
Aerodynamic Design of Axisymmetric Hypersonic Wind-Tunnel Nozzles Using a Least-Squares/Parabolized Navier-Stokes Procedure A92-108
Numerical Simulation of High-Speed Flows About Waveriders with Sharp Leading Edges A92-104
Viscous Equilibrium Computations Using Program LAURA A92-099
Cooling and Roughness Effects on Transition on Nozzle Throats and Blunt Bodies A92-063
Local Bridging to Predict Aerodynamic Coefficients in Hypersonic, Rarefied Flow A92-052
Engineering Aerodynamic Heating Method for Hypersonic Flow A92-050
Hybrid Navier-Stokes/Monte Carlo Method for Reacting Flow Calculations A92-048
Axial Compression Corner Flow with Shock Impingement A92-042
Thermal Protection Analysis of Mars-Earth Return Vehicles A92-029
Computation of Near-Wake, Aerobrake Flowfields A92-027
Liquid Crystal Coatings for Surface Shear-Stress Visualization in Hypersonic Flows A92-023
New Technique for Low-to-High Altitude Predictions of Ablative Hypersonic Flowfields A92-004
Improved Nonequilibrium Viscous Shock-Layer Scheme for Hypersonic Blunt-Body Flowfields A92-003
Application of the LAURA Code for Slender-Vehicle Aerothermodynamics A92-002
Flow over an All-Body Hypersonic Aircraft: Experiment and Computation A92-001
Three-Dimensional Upwind Parabolized Navier-Stokes Code for Real Gas Flows A90-026

Inlet, Nozzle, Diffusor, and Channel Flows

Aerodynamic Design of Axisymmetric Hypersonic Wind-Tunnel Nozzles Using a Least-Squares/Parabolized Navier-Stokes Procedure A92-108
Axial Compression Corner Flow with Shock Impingement A92-042

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Proposed Radiometric Measurement of the Wake of a Blunt Aerobrake A92-121

Multiphase Flows

Effect of Aluminized-Grain Design on Slag Accumulation A92-110
Oscillatory Instabilities in a Rapidly Rotating Liquid Annulus A92-072

Plasmadynamics and MHD

CRRES Electric Field/Langmuir Probe Instrument A92-091
Arcing Rates for High Voltage Solar Arrays: Theory, Experiment, and Predictions A92-079
Plasmadynamic Effects in Thermochemical Nonequilibrium Aerobrake Flows A92-049

Rarefied Flows

Energetics of Gas-Surface Interactions in Transitional Flows at Entry Velocities A92-124
Shock Interference Prediction Using Direct Simulation Monte Carlo A92-123
Optimal Wing Configuration of a Tethered Satellite System in Free Molecular Flow A92-105
Local Bridging to Predict Aerodynamic Coefficients in Hypersonic, Rarefied Flow A92-052

Reacting Flows and Combustion

Calculated Electron Number Density Profiles for the Aeroassist Flight Experiment A92-098
Three-Dimensional Upwind Parabolized Navier-Stokes Code for Real Gas Flows A90-026

Separated Flows

Proposed Radiometric Measurement of the Wake of a Blunt Aerobrake A92-121
Basic Experiment on a Supersonic Vortex Flow Around a Missile Body A92-056
Supersonic Flow over an Axisymmetric Backward-Facing Step A92-053

Shock Waves and Detonations

Effects of Shock Wave Precursors Ahead of Hypersonic Entry Vehicles A92-028

Subsonic Flow

Navier-Stokes Stall Predictions Using an Algebraic Reynolds-Stress Model A92-125

Supersonic Flow

Basic Experiment on a Supersonic Vortex Flow Around a Missile Body A92-056
Supersonic Flow over an Axisymmetric Backward-Facing Step A92-053
Navier-Stokes Computations for Pointed, Spherical, and Flat Tipped Shell at Mach 3 A92-047
Viscous Supersonic Flow Computations over a Delta-Rectangular Wing with Slanting Surfaces A92-024

Viscous Non-Boundary-Layer Flows

Navier-Stokes Stall Predictions Using an Algebraic Reynolds-Stress Model A92-125
Viscous Shock Layer Analysis of the Martian Aerothermal Environment A92-100
Viscous Shock-Layer Solutions with Coupled Radiation and Ablation for Earth Entry A92-026
Improved Nonequilibrium Viscous Shock-Layer Scheme for Hypersonic Blunt-Body Flowfields A92-003

Vortices

Basic Experiment on a Supersonic Vortex Flow Around a Missile Body A92-056

Wave Motion and Sloshing

Liquid Hydrogen Slosh Waves Excited by Constant Reverse Gravity Acceleration of Geyser Initiation A92-077
Oscillatory Instabilities in a Rapidly Rotating Liquid Annulus A92-072

Guidance, Control, and Dynamics Technology

Artificial Intelligence

Expert Systems for Automated Maintenance of a Mars Oxygen Production System A92-062

Astrodynamics

Solar Sail Halo Orbits II: Geocentric Case A92-069
Solar Sail Halo Orbits I: Heliocentric Case A92-068
Solar System "Fast Mission" Trajectories Using Aerogravity Assist A92-032
Hypersonic Maneuvering for Augmenting Planetary Gravity Assist A92-031
Prediction of Radiant Energy Forces on the TOPEX/POSEIDON Spacecraft A92-010

Flight Mechanics

Parametric Study of Manned Aerocapture Part II: Mars Entry A92-128
Steady and Quasisteady Resonant Lock-In of Finned Projectiles A92-109
Payload Vehicle Aerodynamic Re-Entry Analysis A92-101

Information Processing

Efficient Demultiplexing Algorithm for Noncontiguous Carriers A92-073

Launch Vehicle Dynamics

Hypersonic Single Expansion Ramp Nozzle Simulations A92-119
Buffet Response of a Hammerhead Launch Vehicle Wind-Tunnel Model A92-057

Missile Dynamics

Steady and Quasisteady Resonant Lock-In of Finned Projectiles A92-109
Payload Vehicle Aerodynamic Re-Entry Analysis A92-101

Optimization Techniques

Sensor Placement for On-Orbit Modal Testing A92-034

Signal Processing

Efficient Demultiplexing Algorithm for Noncontiguous Carriers A92-073

Spacecraft Dynamics

Optimal Wing Configuration of a Tethered Satellite System in Free Molecular Flow A92-105
Practical Aspects of On-Orbit Modal Identification Using Free-Decay Data A92-038
Sensor Placement for On-Orbit Modal Testing A92-034
Solar F10.7 Radiation: A Short-Term Statistical Model A92-009

Spacecraft Guidance and Control

Solar F10.7 Radiation: A Short-Term Statistical Model A92-009

State Estimation

Statistical Initial Orbit Determination A92-015

System Identification

Practical Aspects of On-Orbit Modal Identification Using Free-Decay Data A92-038

Trajectory Optimization

Mission Design for an Orbiting Volcano Observatory A92-074

Interdisciplinary Topics

Aerospace Technology Utilization

Rapid Method of Calculating the Orbital Radiation Environment A92-102
Conceptual Design of a Fully Reusable Manned Launch System A92-078

Analytical and Numerical Methods

Analytic Model for Orbital Debris Environmental Management A92-075
Application of Taguchi Methods to Propulsion System Optimization for SSTO Vehicles A92-066
Statistical Initial Orbit Determination A92-015
Interpolation/Extrapolation Technique with Application to Hypervelocity Impact of Space Debris A92-008
Parametric Aerodynamic Design of Spinning Finned Projectiles Using a Matrix Interpolation Method A92-005

Atmospheric and Space Sciences

Hypersonic Single Expansion Ramp Nozzle Simulations A92-119
Downward-Deployed Tethered Satellite Systems, Measurement Techniques, and Instrumentation: A Review A92-106
CRRES Spectrometer for Electrons and Protons A92-096
CRRES Low-Energy Magnetospheric Ion Composition Sensor A92-089
CRRES Plasma Wave Experiment A92-083
Medium Energy Ion Mass and Neutral Atom Spectrometer A92-082
SKIRT Space Shuttle Glow Experiment A92-013
Measuring Ionospheric Electron Density Using the Plasma Frequency Probe A92-011
Solar F10.7 Radiation: A Short-Term Statistical Model A92-009
Defining Orbital Debris Environmental Conditions for Spacecraft Vulnerability Assessment A92-006

CAD/CAM

Interpolation/Extrapolation Technique with Application to Hypervelocity Impact of Space Debris A92-008

Human Factors

Extravehicular Activity Self-Rescue Using a Hand-Held Thruster A92-132

Research Facilities and Instrumentation

Aerodynamic Design of Axisymmetric Hypersonic Wind-Tunnel Nozzles Using a Least-Squares/Parabolized Navier-Stokes Procedure A92-108
Downward-Deployed Tethered Satellite Systems, Measurement Techniques, and Instrumentation: A Review A92-106
Low-Energy Ion Mass Spectrometer on CRRES A92-097
Electron and Proton Wide-Angle Spectrometer (EPAS) on the CRRES Spacecraft A92-095
Flow in a Model of the Space Shuttle Main Engine Main Injector Bowl A92-035
Measuring Ionospheric Electron Density Using the Plasma Frequency Probe A92-011

Safety

Extravehicular Activity Self-Rescue Using a Hand-Held Thruster A92-132

Sensor Systems

Electron and Proton Wide-Angle Spectrometer (EPAS) on the CRRES Spacecraft A92-095
Magnetospheric Ion Composition Spectrometer Onboard the CRRES Spacecraft A92-086
Optical Intensity Fluctuations in Re-Entry Object Observations A92-044
Shape Determination for Large Flexible Satellites via Stereo Vision A92-014

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Hypersonic Single Expansion Ramp Nozzle Simulations A92-119
Payload Vehicle Aerodynamic Re-Entry Analysis A92-101
Predicted Flight Performance of Base-Bleed Projectiles A92-055
Free-Flight Trim-Angle Predictions for the Aeroassist Flight Experiment A92-051
Navier-Stokes Computations for Pointed, Spherical, and Flat Tipped Shell at Mach 3 A92-047
Launch Dynamics of Fin-Stabilized Projectiles A92-025
Multizonal Navier-Stokes Solutions for the Multibody Space Shuttle Configuration A92-017
Parametric Aerodynamic Design of Spinning Finned Projectiles Using a Matrix Interpolation Method A92-005

Configurational Design

Comparison of Single-Stage and Two-Stage Airbreathing Launch Vehicles A92-116
Parametric Aerodynamic Design of Spinning Finned Projectiles Using a Matrix Interpolation Method A92-005

Launch Vehicle and Sounding Rocket Systems

Buffet Loads Prediction for a Launch Vehicle and Comparison to Flight Data A92-133
Comparison of Single-Stage and Two-Stage Airbreathing Launch Vehicles A92-116
Conceptual Design of a Fully Reusable Manned Launch System A92-078
Application of Taguchi Methods to Propulsion System Optimization for SSTO Vehicles A92-066

Missile System

Optical Intensity Fluctuations in Re-Entry Object Observations A92-044
Launch Dynamics of Fin-Stabilized Projectiles A92-025

Mission Studies and Economics

Catalog Growth Rate Study (Hazard Analyzed in Geosynchronous Transfer Orbits) A92-007

Propulsion and Propellant Systems

Predicted Flight Performance of Base-Bleed Projectiles A92-055
Acetylene Fuel from Atmospheric CO_2 on Mars A92-045
Flow in a Model of the Space Shuttle Main Engine Main Injector Bowl A92-035

Simulation

Buffet Loads Prediction for a Launch Vehicle and Comparison to Flight Data A92-133

Subsystem Design and Ground Support

Buffet Loads Prediction for a Launch Vehicle and Comparison to Flight Data A92-133

Testing, Flight and Ground

Buffet Response of a Hammerhead Launch Vehicle Wind-Tunnel Model A92-057
Optical Intensity Fluctuations in Re-Entry Object Observations A92-044
Launch Dynamics of Fin-Stabilized Projectiles A92-025

Thermal Protection Systems

Characterization of Advanced Flexible Thermal Protection Material for Space Applications A92-114

Trajectories and Tracking Systems

Endoatmospheric Thrust Termination Condition to Achieve a Low Earth Orbit A92-054
Statistical Initial Orbit Determination A92-015

Propulsion

Airbreathing Propulsion

Transport Efficiency of Spaceplanes with Airbreathing Phases A92-067

Combustion and Combustor Designs

Effect of Aluminized-Grain Design on Slag Accumulation A92-110

Electric and Advanced Space Propulsion

Electron Emission from a Hollow Cathode-Based Plasma Contactor A92-129
Solar Sail Halo Orbits II: Geocentric Case A92-069
Solar Sail Halo Orbits I: Heliocentric Case A92-068
Extended Life and Performance Test of a Low-Power Arcjet A92-065
Theory of Plasma Contactor Neutral Gas Emissions for Electrodynamic Tethers A92-060
Acetylene Fuel from Atmospheric CO_2 on Mars A92-045
Time-Critical Low-Thrust Orbit Transfer Optimization A92-041

Environmental Effects

Space Station Freedom Structure Floating Potential and the Probability of Arcing A92-130
Systems Analysis of Electrodynamic Tethers A92-061
Theory of Plasma Contactor Neutral Gas Emissions for Electrodynamic Tethers A92-060

Liquid Rocket Engines and Missile Systems

Liquid Hydrogen Slosh Waves Excited by Constant Reverse Gravity Acceleration of Geyser Initiation A92-077
Application of Taguchi Methods to Propulsion System Optimization for SSTO Vehicles A92-066
Flow in a Model of the Space Shuttle Main Engine Main Injector Bowl A92-035

Ramjets and Scramjets

Axial Compression Corner Flow with Shock Impingement A92-042

Solid Rocket Motors and Missile Systems

Three-Dimensional Finite Element Analysis of Crack-Defect Interaction A92-113
Acoustic Evaluation of Damage Characteristics in a Composite Solid Propellant A92-112
Effect of Aluminized-Grain Design on Slag Accumulation A92-110

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Parametric Study of Manned Aerocapture Part II: Mars Entry A92-128
Parametric Study of Manned Aerocapture Part I: Earth Return from Mars A92-127
Computational Flow Predictions for Hypersonic Drag Devices A92-122
Design of Hypersonic Waveriders for Aeroassisted Interplanetary Trajectories A92-103
Calculated Electron Number Density Profiles for the Aeroassist Flight Experiment A92-098
Local Bridging to Predict Aerodynamic Coefficients in Hypersonic, Rarefied Flow A92-052
Free-Flight Trim-Angle Predictions for the Aeroassist Flight Experiment A92-051
Earth Aerobraking Strategies for Manned Return from Mars A92-046
Solar System "Fast Mission" Trajectories Using Aerogravity Assist A92-032
Hypersonic Maneuvering for Augmenting Planetary Gravity Assist A92-031
Effects of Shock Wave Precursors Ahead of Hypersonic Entry Vehicles A92-028
Computation of Near-Wake, Aerobrake Flowfields A92-027

Aerobraking Flight Mechanics

Parametric Study of Manned Aerocapture Part II: Mars Entry A92-128
Parametric Study of Manned Aerocapture Part I: Earth Return from Mars A92-127
Design of Hypersonic Waveriders for Aeroassisted Interplanetary Trajectories A92-103
Earth Aerobraking Strategies for Manned Return from Mars A92-046

Humans in Space/ Life Support Systems, EVA

Extravehicular Activity Self-Rescue Using a Hand-Held Thruster A92-132
Mobile Transporter Concept for Extravehicular Activity Assembly of Future Spacecraft A92-064

Mission Design and Analysis

Radiation Exposure Predictions for Short-Duration Stay Mars Missions A92-126
Rapid Method of Calculating the Orbital Radiation Environment A92-102
Chemical-Release Mission of CRRES A92-085
Combined Release and Radiation Effects Satellite (CRRES): Spacecraft and Mission A92-080
Mission Design for an Orbiting Volcano Observatory A92-074
Solar Sail Halo Orbits II: Geocentric Case A92-069
Solar Sail Halo Orbits I: Heliocentric Case A92-068
Transport Efficiency of Spaceplanes with Airbreathing Phases A92-067
Time-Critical Low-Thrust Orbit Transfer Optimization A92-041
Tethered Elevator Design for Space Station A92-033
Catalog Growth Rate Study (Hazard Analyzed in Geosynchronous Transfer Orbits) A92-007

Mission Trajectories (Earth and Interplanetary)

Parametric Study of Manned Aerocapture Part I: Earth Return from Mars A92-127
Design of Hypersonic Waveriders for Aeroassisted Interplanetary Trajectories A92-103
Mission Design for an Orbiting Volcano Observatory A92-074
Time-Critical Low-Thrust Orbit Transfer Optimization A92-041
Solar System "Fast Mission" Trajectories Using Aerogravity Assist A92-032
Hypersonic Maneuvering for Augmenting Planetary Gravity Assist A92-031

Space Experiments

Natural Convection with Thermocapillary and Gravity Modulation Effects in Low-Gravity Environments A92-134
Initial Study of Void Formation During Aluminum Solidification in Reduced Gravity A92-111
Downward-Deployed Tethered Satellite Systems, Measurement Techniques, and Instrumentation: A Review A92-106
Low-Energy Ion Mass Spectrometer on CRRES A92-097
LASSII Pulsed Plasma Probe on CRRES A92-094
Extremely Low Frequency Wave Analyzer A92-093
NRL-701 LASSII/QIMS Quadrupole Ion Mass Spectrometer on CRRES A92-092
Fluxgate Magnetometer Instrument on the CRRES A92-090
CRRES Low-Energy Magnetospheric Ion Composition Sensor A92-089
CRRES Magnetic Electron Spectrometer AFGL-701-5A (MEA) A92-087
Magnetospheric Ion Composition Spectrometer Onboard the CRRES Spacecraft A92-086
Chemical-Release Mission of CRRES A92-085
Data Processing Units for Eight Magnetospheric Particle and Field Sensors A92-084
CRRES Plasma Wave Experiment A92-083
Medium Energy Ion Mass and Neutral Atom Spectrometer A92-082
Overview of the LASSII Experiment on the Combined Release and Radiation Effects Satellite A92-081
Combined Release and Radiation Effects Satellite (CRRES): Spacecraft and Mission A92-080
SKIRT Space Shuttle Glow Experiment A92-013
Measuring Ionospheric Electron Density Using the Plasma Frequency Probe A92-011

Space Processing

Initial Study of Void Formation During Aluminum Solidification in Reduced Gravity A92-111
Effects of g-Jitter and Marangoni Convection on Float Zones A92-076

Space Systems

CRRES Magnetic Electron Spectrometer AFGL-701-5A (MEA) A92-087
Combined Release and Radiation Effects Satellite (CRRES): Spacecraft and Mission A92-080
Conceptual Design of a Fully Reusable Manned Launch System A92-078
Expert Systems for Automated Maintenance of a Mars Oxygen Production System A92-062
Systems Analysis of Electrodynamic Tethers A92-061
Acetylene Fuel from Atmospheric CO_2 on Mars A92-045
Effects of Space Radiation on High-Temperature Superconducting Thin Films of $YBa_2Cu_3O_{7-x}$ A92-043
Techniques for Orbital Debris Control A92-037
Tethered Elevator Design for Space Station A92-033
Catalog Growth Rate Study (Hazard Analyzed in Geosynchronous Transfer Orbits) A92-007

Spacecraft Communication

Efficient Demultiplexing Algorithm for Noncontiguous Carriers A92-073
Land-Mobile-Satellite Fade Measurements in Australia A92-016

Spacecraft Contamination/ Sterilization

Solar Absorptance Degradation of Optical Solar Reflector Radiators on the SPACENET Satellites A92-117

Spacecraft Data Sensing, Processing, and Transmission

Extremely Low Frequency Wave Analyzer A92-093
Data Processing Units for Eight Magnetospheric Particle and Field Sensors A92-084

Spacecraft Power

Space Station Freedom Structure Floating Potential and the Probability of Arcing A92-130
Electron Emission from a Hollow Cathode-Based Plasma Contactor A92-129
Arcing Rates for High Voltage Solar Arrays: Theory, Experiment, and Predictions A92-079
Liquid Hydrogen Slosh Waves Excited by Constant Reverse Gravity Acceleration of Geyser Initiation A92-077
Constant Reverse Thrust Activated Reorientation of Liquid Hydrogen with Geyser Initiation A92-040

Spacecraft Propulsion System Integration

Extended Life and Performance Test of a Low-Power Arcjet A92-065
Constant Reverse Thrust Activated Reorientation of Liquid Hydrogen with Geyser Initiation A92-040

Spacecraft Radiation Protection

Radiation Exposure Predictions for Short-Duration Stay Mars Missions A92-126
Rapid Method of Calculating the Orbital Radiation Environment A92-102
CRRES Spectrometer for Electrons and Protons A92-096

Data Processing Units for Eight Magnetospheric Particle and Field Sensors A92-084
Effects of Space Radiation on High-Temperature Superconducting Thin Films of $YBa_2Cu_3O_{7-x}$ A92-043

Spacecraft Sensor Systems

LASSII Pulsed Plasma Probe on CRRES A92-094
Extremely Low Frequency Wave Analyzer A92-093
NRL-701 LASSII/QIMS Quadrupole Ion Mass Spectrometer on CRRES A92-092
CRRES Low-Energy Magnetospheric Ion Composition Sensor A92-089
Proton Switches A92-088
CRRES Magnetic Electron Spectrometer AFGL-701-5A (MEA) A92-087
Overview of the LASSII Experiment on the Combined Release and Radiation Effects Satellite A92-081

Spacecraft Structural Configuration, Design, and Analysis

Optimal Wing Configuration of a Tethered Satellite System in Free Molecular Flow A92-105
What is an Optimal Spacecraft Structure? A92-070
Mobile Transporter Concept for Extravehicular Activity Assembly of Future Spacecraft A92-064
Thermal Distortion Analysis of an Antenna-Support Truss in Geosynchronous Orbit A92-058
Techniques for Orbital Debris Control A92-037
Tethered Elevator Design for Space Station A92-033
Structural Design Considerations for a Personnel Launch System A92-018

Spacecraft Test and Evaluation

Ground Verification of Deployment Dynamics of Large Deployable Space Structures A92-131
Thermal Design Verification of a Large Deployable Antenna for a Communications Satellite A92-039
Practical Aspects of On-Orbit Modal Identification Using Free-Decay Data A92-038
Sensor Placement for On-Orbit Modal Testing A92-034

Spacecraft Thermal Management

Solar Absorptance Degradation of Optical Solar Reflector Radiators on the SPACENET Satellites A92-117
Testing and Numerical Modeling of Hypervelocity Impact Damaged Space Station Multilayer Insulation A92-115
Testing and Numerical Modeling of Hypervelocity Impact Damaged Space Station Multilayer Insulation A92-115
Long Duration Exposure Facility Surface Temperatures A92-012

Structural Mechanics and Materials

Flexible and Active Structures

Characterization of Advanced Flexible Thermal Protection Material for Space Applications A92-114
Impulse Response of Space Reflectors with Localized Modes A92-071
Systems Analysis of Electrodynamic Tethers A92-061

Materials Structural Properties

Characterization of Advanced Flexible Thermal Protection Material for Space Applications A92-114
Acoustic Evaluation of Damage Characteristics in a Composite Solid Propellant A92-112
Surfactant-Free Liquid Films Under Gravity and Microgravity Conditions A92-022

Structural Composite Materials

Three-Dimensional Finite Element Analysis of Crack-Defect Interaction A92-113
Acoustic Evaluation of Damage Characteristics in a Composite Solid Propellant A92-112
Impact Damage and Residual Tension Strength of a Thick Graphite/Epoxy Rocket Motor Case A92-059

Structural Design

What is an Optimal Spacecraft Structure? A92-070
Mobile Transporter Concept for Extravehicular Activity Assembly of Future Spacecraft A92-064
Impact Damage and Residual Tension Strength of a Thick Graphite/Epoxy Rocket Motor Case A92-059
Structural Design Considerations for a Personnel Launch System A92-018

Structural Durability (including Fatigue and Fracture, and Environmental Degradation)

Three-Dimensional Finite Element Analysis of Crack-Defect Interaction A92-113
Impact Damage and Residual Tension Strength of a Thick Graphite/Epoxy Rocket Motor Case A92-059
Vacuum Ultraviolet Radiation/Atomic Oxygen Synergism in Fluorinated Ethylene Propylene Teflon Erosion A92-019

Structural Dynamics and Characterization

Ground Verification of Deployment Dynamics of Large Deployable Space Structures A92-131
Impulse Response of Space Reflectors with Localized Modes A92-071

Structural Finite Elements

Structural Design Considerations for a Personnel Launch System A92-018

Thermal Effects

Thermal Distortion Analysis of an Antenna-Support Truss in Geosynchronous Orbit A92-058
Long Duration Exposure Facility Surface Temperatures A92-012

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Thermal Protection Analysis of Mars-Earth Return Vehicles A92-029
Viscous Shock-Layer Solutions with Coupled Radiation and Ablation for Earth Entry A92-026
New Technique for Low-to-High Altitude Predictions of Ablative Hypersonic Flowfields A92-004

Aerothermodynamics/Thermal Protection

Engineering Method for Calculating Surface Pressures and Heating Rates on Vehicles with Embedded Shocks A92-120
High Angle-of-Attack Inviscid Shuttle Orbiter Computation A92-118
Viscous Shock Layer Analysis of the Martian Aerothermal Environment A92-100
Viscous Equilibrium Computations Using Program LAURA A92-099
Engineering Aerodynamic Heating Method for Hypersonic Flow A92-050
Thermal Protection Analysis of Mars-Earth Return Vehicles A92-029
Viscous Shock-Layer Solutions with Coupled Radiation and Ablation for Earth Entry A92-026

Computational Heat Transfer

Testing and Numerical Modeling of Hypervelocity Impact Damaged Space Station Multilayer Insulation A92-115
Effects of g-Jitter and Marangoni Convection on Float Zones A92-076
Comparison of Heating Calculations with Experimental Data on a Modified Shuttle Orbiter A92-030

Cryogenics

Constant Reverse Thrust Activated Reorientation of Liquid Hydrogen with Geyser Initiation A92-040

Melting/Solidification

Initial Study of Void Formation During Aluminum Solidification in Reduced Gravity A92-111

Natural Convection

Natural Convection with Thermocapillary and Gravity Modulation Effects in Low-Gravity Environments A92-134
Effects of g-Jitter and Marangoni Convection on Float Zones A92-076

Radiation in Participating Media

Effects of Shock Wave Precursors Ahead of Hypersonic Entry Vehicles A92-028

Thermal Control

Thermal Distortion Analysis of an Antenna-Support Truss in Geosynchronous Orbit A92-058
Thermal Design Verification of a Large Deployable Antenna for a Communications Satellite A92-039

Thermal Modeling and Analysis

Testing and Numerical Modeling of Hypervelocity Impact Damaged Space Station Multilayer Insulation A92-115
Thermal Design Verification of a Large Deployable Antenna for a Communications Satellite A92-039
Prediction of Radiant Energy Forces on the TOPEX/POSEIDON Spacecraft A92-010

Thermochemistry and Chemical Kinetics

Hybrid Navier-Stokes/Monte Carlo Method for Reacting Flow Calculations A92-048

Thermophysical Properties

Solar Absorptance Degradation of Optical Solar Reflector Radiators on the SPACENET Satellites A92-117
Viscous Shock Layer Analysis of the Martian Aerothermal Environment A92-100

Perspectives in Aircraft System Design

Led by Daniel P. Raymer, Conceptual Research
February 20-21, 1993

The focus of this intense two-day course is an overview of aircraft system design from three key perspectives: Commercial Aircraft, Fighter Aircraft, and General Aviation Aircraft. Experts from these areas will give you an insider's view into the design process.

Perspectives in Spacecraft Design

Dr. Brij N. Arawal, Naval Postgraduate School
Emery I. Rives, Consultant
February 20-21, 1993

This short course will provide project and technical managers, subsystem specialists, and engineers in the space industry with a basic understanding of design of most spacecraft subsystems and spacecraft system design. You will be given design equations, tables, and graphs for the solution of typical design problems. If you are a university professor, this course will provide you with the framework for developing an up-to-date curriculum in spacecraft design.

A92-009 Solar F10.7 Radiation: A Short-Term Statistical Model. John D. Vedder and Jill L. Tabor, *McDonnell Douglas Space Systems Company* (**29**, 1, p. 76) Article based on AIAA Paper 91-0116

A92-010 Prediction of Radiant Energy Forces on the TOPEX/POSEIDON Spacecraft. Peter G. Antreasian and George W. Rosborough, *University of Colorado* (**29**, 1, p. 81) Article

A92-011 Measuring Ionospheric Electron Density Using the Plasma Frequency Probe. Mark D. Jensen and Kay D. Baker, *Utah State University* (**29**, 1, p. 91) Article

A92-012 Long Duration Exposure Facility Surface Temperatures. P. C. Hughes and R. C. Tennyson, *University of Toronto, Canada* (**29**, 1, p. 96) Article

A92-013 SKIRT Space Shuttle Glow Experiment. M. Ahmadjian, *U.S. Air Force Systems Command, Hanscom AFB*; D. E. Jennings and M. J. Mumma, *Goddard Space Flight Center*; B. D. Green, *Physical Sciences Inc.*; B. D. Dix, *Space Systems Engineering*; and R. W. Russell, *The Aerospace Corporation* (**29**, 1, p. 102) Article

A92-014 Shape Determination for Large Flexible Satellites via Stereo Vision. D. N. C. Tse and G. R. Heppler, *University of Waterloo, Canada* (**29**, 1, p. 108) Article

A92-015 Statistical Initial Orbit Determination. L. G. Taff, *Space Telescope Science Institute*; B. Belkin, G. A. Schweiter and K. Sommar, *D. H. Wagner Associates, Inc.* (**29**, 1, p. 117) Article

A92-016 Land-Mobile-Satellite Fade Measurements in Australia. Wolfhard J. Vogel, *University of Texas at Austin*; Julius Goldhirsh, *Applied Physics Laboratory, Johns Hopkins University*; and Yoshihiro Hase, *Communications Research Center, Japan* (**29**, 1, p. 123) Article

A92-017 Multizonal Navier-Stokes Solutions for the Multibody Space Shuttle Configuration. C. L. Chen, S. Ramakrishnan and K. Y. Szema, *Rockwell International Science Center*; H. S. Dresser and K. Rajagopal, *Rockwell International Space Division* (**29**, 1, p. 129) Article based on AIAA Paper 90-0434

A92-018 Structural Design Considerations for a Personnel Launch System. Lance B. Bush and Christopher A. Lentz, *NASA Langley Research Center*; James C. Robinson, *Old Dominion University Research Foundation*; and Ian O. MacConochie, *Lockheed Engineering & Science Company* (**29**, 1, p. 138) Article based on AIAA Paper 90-1052 CP902

A92-019 Vacuum Ultraviolet Radiation/Atomic Oxygen Synergism in Fluorinated Ethylene Propylene Teflon Erosion. A. E. Stiegman, David E. Brinza, Eric G. Laue, Mark S. Anderson and Ranty H. Liang, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 1, p. 150) Engineering Note

A92-022 Surfactant-Free Liquid Films Under Gravity and Microgravity Conditions. William E. Decker, Ned J. Penley and Jan J. Sojka, *Utah State University* (**29**, 2, p. 153) Article

A92-023 Liquid Crystal Coatings for Surface Shear-Stress Visualization in Hypersonic Flows. D. C. Reda and D. P. Aeschliman, *Sandia National Laboratories* (**29**, 2, p. 155) Article based on AIAA Paper 90-1513

A92-024 Viscous Supersonic Flow Computations over a Delta-Rectangular Wing with Slanting Surfaces. John S. Chan, *Boeing Aerospace & Electronics* (**29**, 2, p. 159) Article based on AIAA Paper 90-0419

A92-025 Launch Dynamics of Fin-Stabilized Projectiles. J. Bornstein, I. Celmins, P. Plostins and E. Schmidt, *U.S. Army Ballistic Research Laboratory, Aberdeen Proving Ground* (**29**, 2, p. 166) Article based on AIAA Paper 89-3395 CP898

A92-026 Viscous Shock-Layer Solutions with Coupled Radiation and Ablation for Earth Entry. Roop N. Gupta, *NASA Langley Research Center*; Kam-Pui Lee, *Vigyan Research Associates, Inc.*; James N. Moss and Kenneth Sutton, *NASA Langley Research Center* (**29**, 2, p. 173) Article based on AIAA Paper 90-1697

A92-027 Computation of Near-Wake, Aerobrake Flowfields. Peter A. Gnoffo, Joseph M. Price and Robert D. Braun, *NASA Langley Research Center* (**29**, 2, p. 182) Article based on AIAA Paper 91-1371

A92-028 Effects of Shock Wave Precursors Ahead of Hypersonic Entry Vehicles. Scott A. Stanley, *Lockheed Engineering and Sciences Company*; and Leland A. Carlson, *Texas A&M University* (**29**, 2, p. 190) Article based on AIAA Paper 91-1465

A92-029 Thermal Protection Analysis of Mars-Earth Return Vehicles. William D. Henline, *NASA Ames Research Center* (**29**, 2, p. 198) Article based on AIAA Paper 91-0697

A92-030 Comparison of Heating Calculations with Experimental Data on a Modified Shuttle Orbiter. Harris H. Hamilton II, Francis A. Greene and K. James Weilmuenster, *NASA Langley Research Center* (**29**, 2, p. 208) Article based on AIAA Paper 91-1347

A92-031 Hypersonic Maneuvering for Augmenting Planetary Gravity Assist. Angus D. McRonald and James E. Randolph, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 2, p. 216) Article based on AIAA Paper 90-0539

A92-032 Solar System "Fast Mission" Trajectories Using Aerogravity Assist. James E. Randolph and Angus D. McRonald, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 2, p. 223) Article based on AIAA Paper 91-0531

A92-033 Tethered Elevator Design for Space Station. Loren A. Anderson, *University of Central Florida*; and Michael H. Haddock, *NASA Kennedy Space Center* (**29**, 2, p. 233) Article based on AIAA Paper 89-2106

A92-034 Sensor Placement for On-Orbit Modal Testing. Tae W. Lim, *Lockheed Engineering and Sciences Company* (**29**, 2, p. 239) Article based on AIAA Paper 91-1184 CP911

A92-035 Flow in a Model of the Space Shuttle Main Engine Main Injector Bowl. B. E. Thompson and J. Senaldi, *Scientific Research Associates, Inc.*; C. Vafidis and J. H. Whitelaw, *Imperial College, England, UK*; and H. McDonald, *Scientific Research Associates, Inc.* (**29**, 2, p. 247) Article

A92-036 Navier-Stokes Flow Simulation of the Space Shuttle Main Engine Hot Gas Manifold. R.-J. Yang and J. L. C. Chang, *Rockwell International*; and D. Kwak, *NASA Ames Research Center* (**29**, 2, p. 253) Article based on AIAA Paper 87-0368

A92-037 Techniques for Orbital Debris Control. Andrew J. Petro, *NASA Johnson Space Center* (**29**, 2, p. 260) Article based on AIAA Paper 90-1364

A92-038 Practical Aspects of On-Orbit Modal Identification Using Free-Decay Data. Axel Schenk, *German Aerospace Research Establishment, Germany*; and Richard S. Pappa, *NASA Langley Research Center* (**29**, 2, p. 264) Article

A92-039 Thermal Design Verification of a Large Deployable Antenna for a Communications Satellite. H. Tsunoda, K. Nakajima and A. Miyasaka, *NTT Radio Communication Systems Laboratories, Japan* (**29**, 2, p. 271) Article based on AIAA Paper 91-1301

A92-040 Constant Reverse Thrust Activated Reorientation of Liquid Hydrogen with Geyser Initiation. R. J. Hung and K. L. Shyu, *University of Alabama in Huntsville* (**29**, 2, p. 279) Article

A92-041 Time-Critical Low-Thrust Orbit Transfer Optimization. Rodney L. Burton and Carl Wassgren, *University of Illinois* (**29**, 2, p. 286) Engineering Note based on AIAA Paper 90-2620

A92-042 Axial Compression Corner Flow with Shock Impingement. S. Venkateswaran, *Lockheed Engineering and Sciences Company*; David W. Witte and L. Roane Hunt, *NASA Langley Research Center* (**29**, 2, p. 288) Engineering Note based on AIAA Paper 91-0527

A92-043 Effects of Space Radiation on High-Temperature Superconducting Thin Films of $YBa_2Cu_3O_{7-x}$. Roman Herschitz, Alexander Bogorad, Charles Bowman, Surinder Seehra, Antonio Mogro-Campero and Larry Turner, *General Electric Company* (**29**, 2, p. 289) Engineering Note

A92-044 Optical Intensity Fluctuations in Re-Entry Object Observations. R. L. Henry, *Air Force Systems Command, Wright-Patterson AFB* (**29**, 2, p. 292) Engineering Note

A92-045 Acetylene Fuel from Atmospheric CO_2 on Mars. Geoffrey A. Landis and Diane L. Linne, *NASA Lewis Research Center* (**29**, 2, p. 294) Engineering Note

A92-046 Earth Aerobraking Strategies for Manned Return from Mars. Robert D. Braun and Richard W. Powell, *NASA Langley Research Center*; and J. Evans Lyne, *Eloret Institute* (**29**, 3, p. 297) Article based on AIAA Paper 91-2873

A92-047 Navier-Stokes Computations for Pointed, Spherical, and Flat Tipped Shell at Mach 3. Bernard J. Guidos and Paul Weinacht, *U. S. Army Ballistic Research Laboratory*; and David S. Dolling, *University of Texas at Austin* (**29**, 3, p. 305) Article based on AIAA Paper 90-0587

A92-048 Hybrid Navier-Stokes/Monte Carlo Method for Reacting Flow Calculations. Frederik J. de Jong, Jayant S. Sabnis, Richard C. Buggeln and Henry McDonald, *Scientific Research Associates, Inc.* (**29**, 3, p. 312) Article based on AIAA Paper 90-1691

A92-049 Plasmadynamic Effects in Thermochemical Nonequilibrium Aerobrake Flows. R. A. Mitcheltree and J. V. Shebalin, *NASA Langley Research Center* (**29**, 3, p. 319) Article based on AIAA Paper 92-0573

A92-050 Engineering Aerodynamic Heating Method for Hypersonic Flow. Christopher J. Riley, *NASA Langley Research Center*; and Fred R. DeJarnette, *North Carolina State University* (**29**, 3, p. 327) Article based on AIAA Paper 92-0499

A92-051 Free-Flight Trim-Angle Predictions for the Aeroassist Flight Experiment. Leslie A. Yates and Ethiraj Venkatapathy, *Eloret Institute* (**29**, 3, p. 335) Article based on AIAA Paper 91-1632

A92-052 Local Bridging to Predict Aerodynamic Coefficients in Hypersonic, Rarefied Flow. J. Leith Potter and Steven W. Peterson, *Vanderbilt University* (**29**, 3, p. 344) Article based on AIAA Paper 91-0336

A92-053 Supersonic Flow over an Axisymmetric Backward-Facing Step. E. Loth, *University of Illinois at Urbana-Champaign*; K. Kailasanath, *Naval Research Laboratory*; and R. Löhner, *George Washington University* (**29**, 3, p. 352) Article based on AIAA Paper 90-1580

A92-054 Endoatmospheric Thrust Termination Condition to Achieve a Low Earth Orbit. Hideo Ikawa, *Northrop Corporation* (**29**, 3, p. 360) Article based on AIAA Paper 91-2901

A92-055 Predicted Flight Performance of Base-Bleed Projectiles. James E. Danberg, *U. S.Army Ballistic Research Laboratory*; and Charles J. Nietubicz, *U. S. Army Ballistic Research Laboratory* (**29**, 3, p. 366) Article based on AIAA Paper 90-2069

A92-056 Basic Experiment on a Supersonic Vortex Flow Around a Missile Body. Didier Pagan, Pascal Molton and Jean Délery, *Office National d'Etudes et de Recherches Aérospatiales, France* (**29**, 3, p. 373) Article based on AIAA Paper 91-0287

A92-057 Buffet Response of a Hammerhead Launch Vehicle Wind-Tunnel Model. Stanley R. Cole, *NASA Langley Research Center*; and Thomas L. Henning, *General Dynamics Space Systems Division* (**29**, 3, p. 379) Article based on AIAA Paper 91-1050

A92-058 Thermal Distortion Analysis of an Antenna-Support Truss in Geosynchronous Orbit. Jeffery T. Farmer, Deborah M. Wahls and Robert L. Wright, *NASA Langley Research Center*; and A. Louis Tahernia, *TRW, Inc.* (**29**, 3, p. 386) Article based on AIAA Paper 90-1673

A92-059 Impact Damage and Residual Tension Strength of a Thick Graphite/Epoxy Rocket Motor Case. C. C. Poe Jr., *NASA Langley Research Center* (**29**, 3, p. 394) Article

A92-060 Theory of Plasma Contactor Neutral Gas Emissions for Electrodynamic Tethers. R. I. Samanta Roy and D. E. Hastings, *Massachusetts Institute of Technology* (**29**, 3, p. 405) Article

A92-061 Systems Analysis of Electrodynamic Tethers. R. I. Samanta Roy, D. E. Hastings and E. Ahedo, *Massachusetts Institute of Technology* (**29**, 3, p. 415) Article

A92-062 Expert Systems for Automated Maintenance of a Mars Oxygen Production System. Jen-Kuang Huang, Ming-Tsang Ho and Robert L. Ash, *Old Dominion University* (**29**, 4, p. 425) Article

A92-063 Cooling and Roughness Effects on Transition on Nozzle Throats and Blunt Bodies. Anthony Demetriades, *Montana State University* (**29**, 4, p. 432) Article

A92-064 Mobile Transporter Concept for Extravehicular Activity Assembly of Future Spacecraft. Judith J. Watson, Harold G. Bush, Walter L. Heard Jr. and Mark S. Lake, *NASA Langley Research Center*; J. Kermit Jensen, Richard E. Wallsom and James E. Phelps, *Lockheed Engineering and Sciences Company* (**29**, 4, p. 437) Article based on AIAA Paper 90-1049 CP902

A92-065 Extended Life and Performance Test of a Low-Power Arcjet. Francis M. Curran and Thomas W. Haag, *NASA Lewis Research Center* (**29**, 4, p. 444) Article based on AIAA Paper 88-3106

A92-066 Application of Taguchi Methods to Propulsion System Optimization for SSTO Vehicles. Douglas O. Stanley, *NASA Langley Research Center*; Resit Unal, *Old Dominion University*; and C. Russ Joyner, *Pratt & Whitney* (**29**, 4, p. 453) Article based on AIAA Paper 92-0213

A92-067 Transport Efficiency of Spaceplanes with Airbreathing Phases. R. W. Staufenbiel, *University of Technology, Germany* (**29**, 4, p. 460) Article

A92-068 Solar Sail Halo Orbits I: Heliocentric Case. Colin R. McInnes and John F. L. Simmons, *University of Glasgow, Scotland, UK* (**29**, 4, p. 466) Article

A92-069 Solar Sail Halo Orbits II: Geocentric Case. Colin R. McInnes and John F. L. Simmons, *University of Glasgow, Scotland, UK* (**29**, 4, p. 472) Article

A92-070 What is an Optimal Spacecraft Structure?. H. R. Grooms, C. F. DeBarro and S. Paydarfar, *Rockwell International* (**29**, 4, p. 480) Article based on AIAA Paper 90-1051 CP902

A92-071 Impulse Response of Space Reflectors with Localized Modes. Phillip J. Cornwell and Oddvar O. Bendiksen, *Princeton University* (**29**, 4, p. 484) Article based on AIAA Paper 89-1180 CP891

A92-072 Oscillatory Instabilities in a Rapidly Rotating Liquid Annulus. J. A. Szymczyk, J. Siekmann and J. T. Cieśliński, *University of Essen, Germany* (**29**, 4, p. 491) Article based on AIAA Paper 90-0410

A92-073 Efficient Demultiplexing Algorithm for Noncontiguous Carriers. A. A. Thanawala, S. C. Kwatra and M. M. Jamali, *University of Toledo*; and J. Budinger, *NASA Lewis Research Center* (**29**, 4, p. 498) Article

A92-074 Mission Design for an Orbiting Volcano Observatory. Paul A. Penzo and M. Daniel Johnston, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 4, p. 502) Article based on AIAA Paper 90-2875 CP907

A92-075 Analytic Model for Orbital Debris Environmental Management. David L. Talent, *Lockheed Engineering and Sciences Company* (**29**, 4, p. 508) Article based on AIAA Paper 90-1363

A92-076 Effects of g-Jitter and Marangoni Convection on Float Zones. N. Ramachandran, *Universities Space Research Association*; and C. A. Winter, *NASA Marshall Space Flight Center* (**29**, 4, p. 514) Article based on AIAA Paper 90-0654

A92-077 Liquid Hydrogen Slosh Waves Excited by Constant Reverse Gravity Acceleration of Geyser Initiation. R. J. Hung, K. L. Shyu and C. C. Lee, *University of Alabama in Huntsville* (**29**, 4, p. 523) Article

A92-078 Conceptual Design of a Fully Reusable Manned Launch System. Douglas O. Stanley, Theodore A. Talay, Roger A. Lepsch, W. Douglas Morris and Kathryn E. Wurster, *NASA Langley Research Center* (**29**, 4, p. 529) Article based on AIAA Paper 91-0537

A92-079 Arcing Rates for High Voltage Solar Arrays: Theory, Experiment, and Predictions. Daniel E. Hastings and Mengu Cho, *Massachusetts Institute of Technology*; and Hitoshi Kuninaka, *Institute for Space and Astronautical Science, Japan* (**29**, 4, p. 538) Article

A92-080 Combined Release and Radiation Effects Satellite (CRRES): Spacecraft and Mission. M. H. Johnson and John Kierein, *Ball Aerospace Systems Group* (**29**, 4, p. 556) Article

A92-081 Overview of the LASSII Experiment on the Combined Release and Radiation Effects Satellite. P. Rodriguez, *Naval Research Laboratory* (**29**, 4, p. 564) Article

A92-082 Medium Energy Ion Mass and Neutral Atom Spectrometer. H. D. Voss, E. Hertzberg, A. G. Ghielmetti, S. J. Battel, K. L. Appert, B. R. Higgins, D. O. Murray and R. R. Vondrak, *Lockheed Palo Alto Research Laboratory* (**29**, 4, p. 566) Article

A92-083 CRRES Plasma Wave Experiment. Roger R. Anderson, Donald A. Gurnett and Daniel L. Odem, *University of Iowa* (**29**, 4, p. 570) Article

A92-084 Data Processing Units for Eight Magnetospheric Particle and Field Sensors. Rokutaro Koga, Sam S. Imamoto, Norman Katz and Steven D. Pinkerton, *The Aerospace Corporation* (**29**, 4, p. 574) Article

A92-085 Chemical-Release Mission of CRRES. David L. Reasoner, *NASA Marshall Space Flight Center* (**29**, 4, p. 580) Article

A92-086 Magnetospheric Ion Composition Spectrometer Onboard the CRRES Spacecraft. B. Wilken and W. Weiss, *Max-Planck-Institut für Aeronomie, Germany*; D. Hall and M. Grande, *Rutherford-Appleton Laboratories, England, UK*; F. Soraas, *University of Bergen, Norway*; and J. F. Fennell, *The Aerospace Corporation* (**29**, 4, p. 585) Article

A92-087 CRRES Magnetic Electron Spectrometer AFGL-701-5A (MEA). A. L. Vampola, J. V. Osborn and B. M. Johnson, *The Aerospace Corporation* (**29**, 4, p. 592) Engineering Note

A92-088 Proton Switches. J. B. Blake, *The Aerospace Corporation* (**29**, 4, p. 595) Engineering Note

A92-089 CRRES Low-Energy Magnetospheric Ion Composition Sensor. D. T. Young, *Southwest Research Institute*; B. L. Barraclough, D. J. McComas, M. F. Thomsen, K. McCabe and R. Vigil, *Los Alamos National Laboratory* (**29**, 4, p. 596) Engineering Note

A92-090 Fluxgate Magnetometer Instrument on the CRRES. H. J. Singer, *Phillips Laboratory, Hanscom AFB*; Peter Anderson, *Boston University*; F. Mozer, P. Harvey and J. Wygant, *University of California, Berkeley*; and William McNeil, *RADEX, Inc.* (**29**, 4, p. 599) Engineering Note

A92-091 CRRES Electric Field/Langmuir Probe Instrument. J. R. Wygant, P. R. Harvey, D. Pankow and F. S. Mozer, *University of California, Berkeley*; N. Maynard, H. Singer, M. Smiddy and W. Sullivan, *Phillips Laboratory, Hanscom AFB*; and P. Anderson, *Boston University* (**29**, 4, p. 601) Engineering Note

A92-092 NRL-701 LASSII/QIMS Quadrupole Ion Mass Spectrometer on CRRES. E. Trzcinski, J. F. Borghetti, L. Wlodyka, G. Federico and D. E. Hunton, *Phillips Laboratory, Hanscom AFB* (**29**, 4, p. 604) Engineering Note

A92-093 Extremely Low Frequency Wave Analyzer. H. C. Koons, J. L. Roeder and W. B. Harbridge, *The Aerospace Corporation* (**29**, 4, p. 606) Engineering Note

A92-094 LASSII Pulsed Plasma Probe on CRRES. M. M. Baumback, P. Rodriguez, D. N. Walker and C. L. Siefring, *Naval Research Laboratory* (**29**, 4, p. 607) Engineering Note

A92-095 Electron and Proton Wide-Angle Spectrometer (EPAS) on the CRRES Spacecraft. A. Korth and G. Kremser, *Max-Planck-Institut für Aeronomie, Germany*; B. Wilken and W. Güttler, *Max-Planck Institut für Aeronomie, Germany*; S. L. Ullaland, *University of Bergen, Germany*; and R. Koga, *The Aerospace Corporation* (**29**, 4, p. 609) Engineering Note

A92-096 CRRES Spectrometer for Electrons and Protons. R. W. Nightingale, R. R. Vondrak, E. E. Gaines, W. L. Imhof, R. M. Robinson, S. J. Battel, D. A. Simpson and J. B. Reagan, *Lockheed Palo Alto Research Laboratory* (**29**, 4, p. 614) Engineering Note

A92-097 Low-Energy Ion Mass Spectrometer on CRRES. H. H. Collin, J. M. Quinn, G. R. Smith, E. Hertzberg and S. Roselle, *Lockheed Palo Alto Research Laboratory*; and S. J. Battel, *Battel Engineering* (**29**, 4, p. 617) Engineering Note

A92-098 Calculated Electron Number Density Profiles for the Aeroassist Flight Experiment. Robert B. Greendyke, *ViGYAN, Inc.*; Peter A. Gnoffo and R. Wes Lawrence, *NASA Langley Research Center* (**29**, 5, p. 621) Article based on AIAA Paper 92-0804

A92-099 Viscous Equilibrium Computations Using Program LAURA. Francis A. Greene and Roop N. Gupta, *NASA Langley Research Center* (**29**, 5, p. 627) Article

A92-100 Viscous Shock Layer Analysis of the Martian Aerothermal Environment. R. N. Gupta, *NASA Langley Research Center*; K. P. Lee, *ViGYAN, Inc.*; J. N. Moss and K. Sutton, *NASA Langley Research Center* (**29**, 5, p. 633) Article based on AIAA Paper 91-1345

A92-101 Payload Vehicle Aerodynamic Re-Entry Analysis. Donald Tong, *Boeing Defense & Space Group* (**29**, 5, p. 641) Article based on AIAA Paper 91-0865

A92-102 Rapid Method of Calculating the Orbital Radiation Environment. Michele M. Gates and Mark J. Lewis, *University of Maryland*; and William Atwell, *Rockwell International* (**29**, 5, p. 646) Article based on AIAA Paper 91-0098

A92-103 Design of Hypersonic Waveriders for Aeroassisted Interplanetary Trajectories. Mark J. Lewis, *University of Maryland*; and Angus D. McRonald, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 5, p. 653) Article based on AIAA Paper 91-0053

A92-104 Numerical Simulation of High-Speed Flows About Waveriders with Sharp Leading Edges. Kevin D. Jones and F. Carroll Dougherty, *University of Colorado* (**29**, 5, p. 661) Article based on AIAA Paper 90-3065 CP908

A92-105 Optimal Wing Configuration of a Tethered Satellite System in Free Molecular Flow. Andrew Dominic Santangelo and Glen E. Johnson, *University of Michigan* (**29**, 5, p. 668) Article

A92-106 Downward-Deployed Tethered Satellite Systems, Measurement Techniques, and Instrumentation: A Review. Kenneth G. Brown and Leonard T. Melfi Jr., *Old Dominion University*; Billy T. Upchurch and George M. Wood Jr., *NASA Langley Research Center* (**29**, 5, p. 671) Article

A92-107 Numerical Dissipation in F3D Thin-Layer Navier-Stokes Solution for Flows with Wall Transpiration. M. Kandula, *Lockheed Engineering & Sciences Company*; and F. W. Martin Jr., *NASA Johnson Space Center* (**29**, 5, p. 678) Article based on AIAA Paper 91-3204 CP918

A92-108 Aerodynamic Design of Axisymmetric Hypersonic Wind-Tunnel Nozzles Using a Least-Squares/Parabolized Navier-Stokes Procedure. John J. Korte, *NASA Langley Research Center* (**29**, 5, p. 685) Article based on AIAA Paper 92-0332

Errata (**29**, 6, p. 870)

A92-109 Steady and Quasisteady Resonant Lock-In of Finned Projectiles. N. Ananthkrishnan and S. C. Raisinghani, *Indian Institute of Technology, India* (**29**, 5, p. 692) Article

A92-110 Effect of Aluminized-Grain Design on Slag Accumulation. E. Hess, K. Chen, P. Acosta, D. Brent and F. Fendell, *TRW Space and Technology Group* (**29**, 5, p. 697) Article

A92-111 Initial Study of Void Formation During Aluminum Solidification in Reduced Gravity. Francis P. Chiaramonte, George Foerster, Daniel J. Gotti, Eric S. Neumann and J. Chris Johnston, *NASA Lewis Research Center*; and Kenneth J. De Witt, *University of Toledo* (**29**, 5, p. 704) Article based on AIAA Paper 92-0845

A92-112 Acoustic Evaluation of Damage Characteristics in a Composite Solid Propellant. C. T. Liu, *Phillips Laboratory, Edwards AFB* (**29**, 5, p. 709) Article

A92-113 Three-Dimensional Finite Element Analysis of Crack-Defect Interaction. C. T. Liu, *Phillips Laboratory, Edwards AFB* (**29**, 5, p. 713) Article based on AIAA Paper 90-0927

A92-114 Characterization of Advanced Flexible Thermal Protection Material for Space Applications. Joseph P. Clayton, *Remtech, Inc.*; and Michael L. Tinker, *NASA Marshall Space Flight Center* (**29**, 5, p. 718) Article based on AIAA Paper 91-1047

A92-115 Testing and Numerical Modeling of Hypervelocity Impact Damaged Space Station Multilayer Insulation. William Keith Rule, *University of Alabama* (**29**, 5, p. 727) Article

A92-116 Comparison of Single-Stage and Two-Stage Airbreathing Launch Vehicles. Douglas O. Stanley, *NASA Langley Research Center;* Alan W. Wilhite and Walter C. Englund, *NASA Langley Research Center*; and Jeffrey R. Laube, *McDonnell Douglas Space Systems Company* (**29**, 5, p. 735) Article based on AIAA Paper 91-5014

A92-117 Solar Absorptance Degradation of Optical Solar Reflector Radiators on the SPACENET Satellites. Charles R. Naegeli, *GTE Spacenet Corporation* (**29**, 5, p. 741) Article based on AIAA Paper 90-1671

A92-118 High Angle-of-Attack Inviscid Shuttle Orbiter Computation. William L. Kleb and K. James Weilmuenster, *NASA Langley Research Center* (**29**, 5, p. 746) Engineering Note

A92-119 Hypersonic Single Expansion Ramp Nozzle Simulations. Stephen M. Ruffin and Ethiraj Venkatapathy, *NASA Ames Research Center*; Earl R. Keener, *Eloret Institute*; and Frank W. Spaid, *McDonnell Douglas Research Laboratories* (**29**, 6, p. 749) Article based on AIAA Paper 92-0387

A92-120 Engineering Method for Calculating Surface Pressures and Heating Rates on Vehicles with Embedded Shocks. D. Brian Landrum, Fred R. DeJarnette and Bret L. Boman, *North Carolina State University* (**29**, 6, p. 756) Article based on AIAA Paper 91-5060

A92-121 Proposed Radiometric Measurement of the Wake of a Blunt Aerobrake. A. W. Strawa and C. Park, *NASA Ames Research Center*; W. C. Davy, D. S. Babikian and D. K. Prabhu, *Eloret Institute* (**29**, 6, p. 765) Article based on AIAA Paper 91-1408

A92-122 Computational Flow Predictions for Hypersonic Drag Devices. Susan Tokarcik and Ethiraj Venkatapathy, *Eloret Institute* (**29**, 6, p. 773) Article

A92-123 Shock Interference Prediction Using Direct Simulation Monte Carlo. Ann B. Carlson and Richard G. Wilmoth, *NASA Langley Research Center* (**29**, 6, p. 780) Article based on AIAA Paper 92-0492

A92-124 Energetics of Gas-Surface Interactions in Transitional Flows at Entry Velocities. R. G. Wilmoth, *NASA Langley Research Center;* V. K. Dogra and J. N. Moss, *NASA Langley Research Center* (**29**, 6, p. 786) Article based on AIAA Paper 91-1338

A92-125 Navier-Stokes Stall Predictions Using an Algebraic Reynolds-Stress Model. Lars Davidson, *Chalmers University of Technology, Sweden*; and Arthur Rizzi, *FFA, The Aeronautical Research Institute of Sweden* (**29**, 6, p. 794) Article

A92-126 Radiation Exposure Predictions for Short-Duration Stay Mars Missions. Scott A. Striepe, John E. Nealy and Lisa C. Simonsen, *NASA Langley Research Center* (**29**, 6, p. 801) Article

A92-127 Parametric Study of Manned Aerocapture Part I: Earth Return from Mars. J. Evans Lyne, *Eloret Institute*; M. E. Tauber, *NASA Ames Research Center*; and Robert D. Braun, *NASA Langley Research Center* (**29**, 6, p. 808) Article based on AIAA Paper 91-2874

A92-128 Parametric Study of Manned Aerocapture Part II: Mars Entry. J. E. Lyne, *Eloret Institute*; A. Anagnost, *Stanford University*; and M. E. Tauber, *NASA Ames Research Center* (**29**, 6, p. 814) Article based on AIAA Paper 91-2871

A92-129 Electron Emission from a Hollow Cathode-Based Plasma Contactor. John D. Williams, *Hughes Research Laboratories*; and Paul J. Wilbur, *Colorado State University* (**29**, 6, p. 820) Article

A92-130 Space Station Freedom Structure Floating Potential and the Probability of Arcing. Daniel E. Hastings, Mengu Cho and Jiong Wang, *Massachusetts Institute of Technology* (**29**, 6, p. 830) Article

A92-131 Ground Verification of Deployment Dynamics of Large Deployable Space Structures. Akira Meguro and Jin Mitsugi, *NTT Radio Communications Systems Laboratories, Japan* (**29**, 6, p. 835) Article

A92-132 Extravehicular Activity Self-Rescue Using a Hand-Held Thruster. Adam R. Brody and Rick Jacoby, *Sterling Software*; and Stephen R. Ellis, *NASA Ames Research Center* (**29**, 6, p. 842) Article

A92-133 Buffet Loads Prediction for a Launch Vehicle and Comparison to Flight Data. Mohamed M. Ragab, *General Dynamics Space Systems Division* (**29**, 6, p. 849) Article based on AIAA Paper 92-0716

A92-134 Natural Convection with Thermocapillary and Gravity Modulation Effects in Low-Gravity Environments. T. C. Jue and B. Ramaswamy, *Rice University* (**29**, 6, p. 856) Article based on AIAA Paper 92-0667
